Professional Experience

Salesforce Developer / Administrator

March 2023 - Present | Hyderabad

COGNIZANT

- Designed and supported Salesforce solutions using custom objects, fields, validation rules, page layouts, record types, approval processes, and Flows for business stakeholders.
- Enhanced applications through out-of-the-box configuration and custom development using Apex, Triggers, SOQL, custom settings, and custom metadata.
- Built and supported Lightning-based functionality, troubleshooting issues and improving application stability, usability, and user experience.
- Configured Salesforce roles, profiles, permission sets, sharing rules, and public groups to support secure user access and administration.
- Collaborated with business analysts, QA teams, architects, and developers to translate requirements into solutions and support testing and defect resolution.
- Prepared technical documentation and supported knowledge transfer and code review activities to improve solution maintainability.
- Participated in Agile ceremonies, shared status updates, estimated user stories, and coordinated work across cross-functional teams.
- Supported release and deployment activities across Salesforce environments, performed impact analysis, and validated application changes.
- Worked on enterprise implementations involving reports, dashboards, Flows, user support, issue resolution, and basic integration exposure.
